Ensuring Uninterrupted Power Supply

Equipping healthcare facilities with backup power sources helps ensure their uninterrupted operation during power outages and maintain access to medical services for the population. It also helps preserve medicines and biological samples and maintain appropriate working conditions for medical personnel.

Backup power supply for healthcare facilities to ensure uninterrupted operation during emergency and scheduled power outages

Continuity of medical services for the population, including medical examinations, procedures, and dental treatment

Stable operation of medical equipment, including clinical diagnostic analysers and equipment requiring an uninterrupted power supply.

Maintaining proper storage for vaccines, medicines, and biological samples, as well as compliance with sanitary and hygiene standards.

Maintaining essential healthcare services, including lighting, internet connectivity, heating, and blood collection.

Procedure for Processing and Distributing Humanitarian Aid

Consistent documentation at every stage ensures traceability of humanitarian aid, from its initial receipt to its transfer to the final recipient and registration in the accounting records. This supports transparent allocation of resources, proper oversight of asset preservation and the intended use of humanitarian aid to meet the needs of the community.

Receipt of Humanitarian Aid

The Executive Committee of Sumy City Council receives humanitarian aid and processes the relevant accompanying documentation.

Formal Transfer into Municipal Ownership

The relevant decision is adopted by Sumy City Council at a council session, followed by the proper documentation of the property.

Transfer to the Designated Municipal Enterprise or Institution

The property is formally transferred to the relevant municipal enterprise or institution for its intended use.

Registration on the Balance Sheet

The receiving enterprise or institution officially records the property on its balance sheet and in its accounting records.
